

# Apple Teacher Institute

2nd - 5th April 2012

## Digital Learning in a Mobile World

In a world where learning can take place at any place and at anytime, educators want to find the best ways of using digital devices to their full potential. One of the best ways of doing this is to see how others are using these new tools with great benefits in learning gains, and to understand the pedagogy that underpins the excitement using mobile devices.

On this four-day residential course, you will learn in an environment where you are given the opportunity, inspiration, space and support to be creative with like-minded colleagues. All learning on this unique course will give you a thorough mobiles devices but is carried out in a relaxed and friendly manner so that newcomers to the disciplines covered will not feel intimidated.

### What you will learn:

- How to find and use digital resources effectively on an iPad or iPod touch
- What Apps are the best for learning and teaching
- What learning activities work best with iPad and iPod touch
- How to use creative learning activities with iPad and iPod touch
- How iPad and iPod touch can be used as a creative tool
- How to create effective resources for iPad and iPod touch
- How to manage and deploy iPad and iPod touch in educational organisations
- How to plan for change in educational organisations with iPad and iPod touch
